

Master Erasmus Mundus Action 1 called EM3E (Opportunity for Balkan students)

The University Montpellier 2 is the coordinator of this master, and as the call of applications opened, Kosovo students can apply as well for this project, especially since they're really looking for Balkan students.

As a short description, the Erasmus Mundus Master in Membrane Engineering EM3E offers an advanced education programme related to membrane science and engineering at the interface between material science and chemical engineering and focused on specific applicative fields.

It involves 6 High Education Insitutions of 5 European countries: University of Twente (Netherlands), Universidade Nova de Lisboa (Portugal), Universidad de Zaragoza (Spain), Institute of Chemical Technology Prague (Czech Republic), Université Paul Sabatier (Toulouse, France) and Université Montpellier 2 (France, coordinating organisation). Associated partners are the Universitat della Calabria (Italy), the Catholic University of Leuven (Belgium) and the Université Hassan II of Mohammedia (Morocco).

The deadline is on the 31st of January.
